

Key Features

Cloud Based Smart Queue & Token Management System

Token Booking: Empower customers to book tokens online, through QR codes, or at your manual counter.

Customizable Display Options: Choose from video, audio, or text-based displays.

Virtual Queuing: Allow customers to book queues online, reducing physical wait times.

Real-time Updates: Keep customers informed about their position and estimated wait time via SMS or WhatsApp (optional, charges apply).

Efficient Staff Management: Optimize resource allocation based on real-time data.

Valuable Analytics: Gain insights into customer and staff behavior for data-driven decisions.

Cross-Platform Accessibility: Manage your queues seamlessly on Windows, Android, or iOS devices.

Robust Security: Your data is our priority. We utilize industry-leading servers and security protocols to protect your sensitive information and automatically delete all the data every 90 days.

Appointment Booking:

Pre-booking: Enable customers to schedule appointments in advance, ensuring optimal resource utilization.

Online Payments: Offer convenient and secure payment options for appointment bookings.

Optional SMS and WhatsApp Integration:

OUR SATISFIED CLIENTS

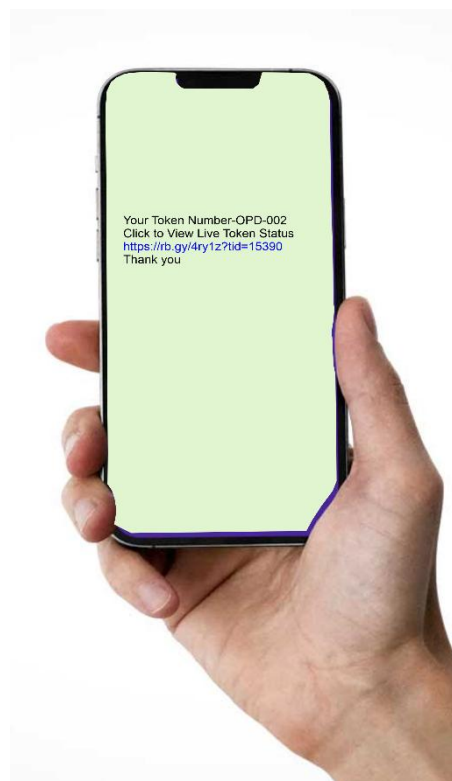

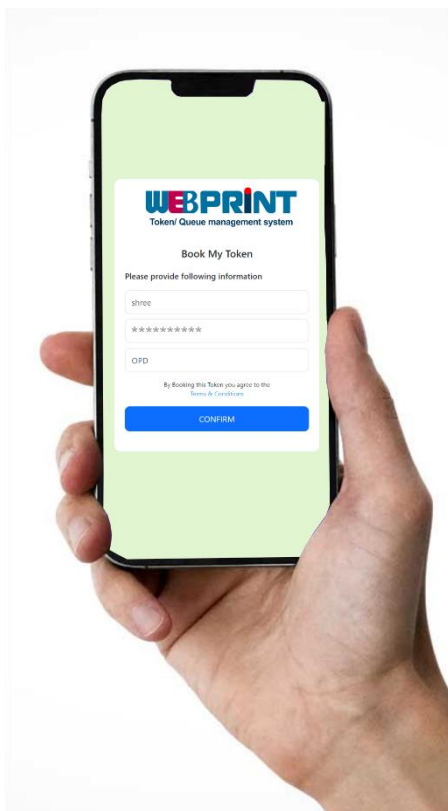

SMS-Based Information

Since it is a digital queue / token management system, tokens can be SMS based, or you may print on paper.
